

Simple, fast end-to-end document creation and distribution online

No software to install

Compatible with web browsers

Data fully encrypted

WinVoiceWeb is a document creation and workflow management application developed by Voice Technologies to save healthcare providers time and money.

It is a complete end-to-end solution that allows users to create letters, reports and other documents and distribute them electronically or in print.

Entirely web-based, WinVoiceWeb combines the functionality of our document workflow application WinVoicePro with a fully refreshed user interface to allow even quicker document production, management and distribution.

Key features

- ▶ Web-based application, removing the need for any software installation
- ▶ Incorporates all the document management features currently available in WinVoicePro
- ▶ Links with existing applications and databases to populate documents automatically
- ▶ Sends encrypted electronic documents for amendment, approval and dispatch
- ▶ Easy to search for and add recipients
- ▶ Can be launched from within third party systems, such as Clinical Portal
- ▶ Can only be accessed by authenticated users.

Key benefits

- ▶ Eliminates the time, cost and potential errors involved in re-keying data
- ▶ Accelerates document turnaround times
- ▶ Reduces resource, postage and printing costs.

▲ **New document creation:** In WinVoiceWeb, the creation of a new document has never been easier. A simple two step process, simply enter a patient identifier and select a letter template and your document will be created.

Verification: Documents can be created and verified in one step or, alternatively, can be saved for verification at a later date. Documents requiring verification are easily accessible from the home screen of WinVoiceWeb.
